1.0 A New Payments Architecture

Do you agree with our recommendation to move towards a 'push' payment mechanism for all payment types?

Yes No

If not, please explain why.

In the proposed transition approach it is expected that Third Party Service Providers including current independent software providers, bureaux and gateway providers will update their systems to enable existing payment formats to continue to operate with no or limited negative impact on the current users of services such as Direct Debit.

As a PSP or TPSP, do you agree we have identified the implications of adopting a push model adequately?

Yes No

If not, please set out any additional impacts that need to be considered.

As a potential vendor, participant or user of the NPA, are there any other design considerations that should be included in the NPA, especially with regards to considering the needs of end-users?

Yes No

If yes, please provide a description of those areas and why they are important to explore.

Question 1.4 n PSPs Vendors

The nature of the layering approach enables new components to be added or updated with minimal impact on components in other layers. We believe this will support greater levels of competition and innovation especially in the upper layers of the NPA.

In your view, as a vendor or service provider, will layering the NPA in this way simplify access and improve your ability to compete in the UK payments market?

Yes No

If not, please explain why.

With the recommended centralised clearing and settlement option, as a participant or vendor who is accessing or delivering the clearing and settlement service, do you think:
